

ANNOUNCEMENT AND CALL FOR ABSTRACTS

2010 ANNUAL JOURNAL SYMPOSIUM

“Outcomes beyond the Operating Room”

The American Society of Anesthesiologists (ASA) and its journal *ANESTHESIOLOGY* announce the 19th annual Journal Symposium, to be held at the ASA Annual Meeting on October 19, 2010, in San Diego, California. The 2010 Journal Symposium will highlight up-and-coming and noteworthy concepts in anesthesia research and clinical practice.

Anesthesiologists have generally considered their work done and successful if patients were well a day or two after surgery. However, there is increasing evidence that perioperative management has the potential to influence patient outcomes weeks, months, and perhaps even years after surgery. This symposium will explore aspects of anesthetic care most likely to be associated with alterations in long-term outcome.

Three invited speakers will lead the session. Daniel I. Sessler, M.D., Professor and Chair Department of OUTCOMES RESEARCH, Cleveland Clinic, will discuss long-term consequences of intraoperative management; Philip J. Devereaux, M.D., Ph.D., Associate Professor, McMaster University Departments of Medicine (Division of Cardiology) and Clinical Epidemiology and Biostatistics, will describe how we can substantially cut the risk of major vascular complications among patients undergoing noncardiac surgery in the coming decade; and Simon C. Body, M.B.Ch.B., M.P.H., Assistant Professor of Anesthesiology, Brigham and Women's Hospital, Harvard Medical School, will discuss the team role of intraoperative transfusion management upon long-term outcomes.

Investigators from around the world with an interest in this subject are requested to submit their work to the ASA for the Annual Meeting. Abstracts from both basic and clinical sciences are welcome. Studies examining or evaluating key biomarkers in perioperative and critical care medicine are encouraged. Abstracts should be submitted *via* the usual online process (which can be accessed through the Web sites www.asahq.org and www.anesthesiology.org). Interested individuals should be sure to check the “Journal Symposium” box on the abstract submission form to be considered for inclusion in this special session. The deadline for abstract submission is March 31, 2010. Abstract selections will be made by the symposium organizers in conjunction with members of the *ANESTHESIOLOGY* Editorial Board.

The authors of abstracts selected for the symposium will be offered an opportunity to submit their work to *ANESTHESIOLOGY* for inclusion in a special issue to be published in the spring of 2011.

ANNOUNCEMENT AND CALL FOR ABSTRACTS

2010 ANNUAL ANESTHESIOLOGY/FAER Joint Conference

“Debunking Myths of Transfusion”

ANESTHESIOLOGY, in conjunction with the Foundation for Anesthesia Education and Research (FAER), is pleased to announce the 3rd annual joint conference to be held at the American Society of Anesthesiologists (ASA) Annual Meeting on October 19, 2010, in San Diego, California.

A beneficial effect on outcome has never been demonstrated for blood product transfusion. In contrast, hundreds of publications have found an association between blood product transfusion and adverse outcomes. However, recent literature indicates that transfusion of “fresh” red cells may have fewer adverse consequences. Furthermore, recent literature also states that focusing on coagulation is essential early after major trauma and the avoidance of fresh frozen plasma transfusion may be misguided. This session will explore these issues and provide a forum for presentation of recent findings in transfusion and resuscitation.

Three invited speakers will lead the session. John Holcomb, M.D., Director of the Center for Translational Injury Research at the University of Texas Health Science Center, Houston, will describe the role of FFP in improving outcomes after trauma; Elliott Bennett-Guerrero, M.D., Duke Clinical Research Institute, Duke University, will discuss new blood on postoperative outcomes; and Donat R. Spahn, M.D., F.R.C.A., University Hospital Zürich, will describe outcomes after transfusion.

These lectures will be accompanied by the presentation of posters selected for their relevance to the symposium topic. The joint conference date, time and location will be announced at a later date.

Abstracts should be submitted *via* the usual online process (which can be accessed *via* the Web sites www.asahq.org and www.anesthesiology.org). Interested individuals should be sure to check the “ANESTHESIOLOGY/FAER Joint Conference” box on the abstract submission form to be considered for inclusion in this special session. The deadline for abstract submission is March 31, 2010.

The authors of abstracts selected for the session will be offered an opportunity to submit their work to *ANESTHESIOLOGY* for inclusion in a special issue to be published in the spring of 2011.
