## ERRATUM

### Patient Blood Management: Erratum

In the article on page 1367 of the June 2012 issue, figure 1 shows “Ferritin 30–100 µg/l and/or TSAT > 20%” and instead should have read “Ferritin 30–100 µg/l and/or TSAT < 20%.” The corrected figure appears below.

The publisher regrets this error.

**Fig. 1.** Algorithm for the detection, evaluation, and management of preoperative anemia. SF = serum ferritin; TSAT = transferrin saturation. Modified, with permission, from Goodnough LT. *Br J Anaesth* 2011; 106:13–22.
