

MIND TO MIND

*Creative writing that explores the abstract side
of our profession and our lives*

Carol Wiley Cassella, M.D., Editor

My Postop Visit

James M. Berry, M.D.

You calmed my fear
Cannulated my vein
Examined my airway
Monitored my heart
Erased my consciousness
Stole my breath
Blocked my receptors
Supported my circulation
Replaced my blood
Warmed my skin
Then whispered, "We're done..."

Thank you
