ERRATA

The article, "Myocardial Functional and Metabolic Responses to Ischemia in Swine during Halothane and Fentanyl Anesthesia," which appeared in the February 1982 issue of ANESTHESIOLOGY contained several errors.

In table 3 on page 88, the unit for inosine should be $\mu mol \cdot l^{-1}$, not $mmol \cdot l^{-1}$. In table 4 on page 89, the unit for glucose uptake should be $\mu mol \cdot {}^{-1}$, not $mmol \cdot min^{-1}$; the unit for free fatty acids is $mmol \cdot min^{-1}$, not mmol; and the unit for free fatty acid uptake is $\mu mol \cdot min^{-1}$, not $mmol \cdot min^{-1}$.
